## SYSTEM UPDATE

JULY 2015

## Immunization Reports

- 1 Clients Created Report
- 1 Mass Immunization Event Worksheet
- 1 Client Immunization Record

### Clients Created Report (QRC 5.1)

The Clients Created Report provides details of client records that were inadvertently created while using the Mass Immunization client upload template (see QRC 3.3). Once the report is generated, users will need to manage the inadvertently created client records listed on the report by: i) inactivating the client record (see QRC 3.17) and ii) removing the duplicate client record from the Mass Immunization Event Worksheet if it was added to the event prior to managing the client record.

### Mass Immunization Event Worksheet (QRC 5.2)

The Mass Immunization Event Worksheet is a "moment in time" report that can be used to plan and manage a mass immunization event. The report can be generated at any time, however, at a minimum the report should be generated and printed just prior to an event and brought to the event for use during a downtime.

### Client Immunization Record (QRC 5.3)

The Client Immunization Record is a report that replaces the Immunization Certificate generated by MIMS and issued by Manitoba Health, Healthy Living & Seniors (MHLS). Public health units are able to generate the Client Immunization Record and provide it to clients according to their regional policy. This report will be provided by MHLS with the regularly scheduled immunization reminder letters (15 months, 20 months and 5.5 years).
