April System Update

- 1 Service Delivery Location Updates
- 2 Quality Assurance Report Requirement suggestions
- 3 Training and Support Tools updates
- 4 Adverse Storage Conditions
- 5 Forecaster Changes
- 6 Notice of Change Form reminder
- 7 Website Links

Service Delivery Location Updates

We have been reviewing our list of Service Delivery Locations (SDLs) and have added some new SDLs and added alternate names for some SDLs. We will also be adding addresses for some existing SDLs.

To specify a Service Delivery Location first click on the 'Find' button. Then search, or type the name of the Service Delivery Location you wish to specify, select it and click on 'Select' button. Then click 'Close' to close.

Service Delivery Location: MB Health > Winnipeg Health (including Churchill) > Winnipeg Medical Clinics WRHA Direct Operations > [2000473 Quick Care Clinic (St Mary's Rd)]

Type Search

Start typing the name of the Service Delivery Location. Matches will begin to appear below. Select the match with the keyboard or mouse.

SDL Name: brochet nu
Barren Lands (Brochet) Federal Nursing Station, Brochet, Manitoba

Provider: Ruth Deane (RN)
Click Find to select a provider:
Provider: Deane (RN), Ruth

This will allow you to 'Find' an SDL even if the initial spelling of the SDL is different. In the above example, I can search for Brochet Nursing Station, and 'Find' Barren Lands (Brochet) Federal Nursing Station.

This is a work in progress. If you have any suggestions for additional names for SDLs that would make finding them easier, please submit them to the Manitoba eHealth Service desk via email to servicedesk@manitoba-ehealth.ca

Quality Assurance Report Requirement Suggestions

This fall the Panorama Support team performed several data quality checks at the request of Manitoba Health, Seniors and Active Living (MHSAL) due to a large number influenza immunizations that had no Organization or SDL specified. This was discussed at the recent user group meeting. We would like to document what the various data quality issues are and what, if anything, we could do to help mitigate them. We would like to identify requirements for either an 'in application report' or a routinely scheduled data quality query that would assist in identifying issues in a timely way. If you have suggestions that would help inform this process, please forward them to your regional peer supporter.

Training and Support Tool updates

QRC 1.13 Documenting Neonate High Risk for Hep B to Trigger Forecast – Updated to reflect current configuration. Updated document can be found here: <http://www.panoramamanitoba.ca/files/pan-qrc-1.13.pdf>

MB6810C-Immunization count by Provider Type (Geography) Report User Guide – Revised 'group by' definitions. Updated document can be found here: <http://www.panoramamanitoba.ca/files/pan-r-mb6810c-i-cpt.pdf>

MB1705-MB Postal Code User Guide – Guide has been added to the Panorama website and found here: <http://www.panoramamanitoba.ca/files/pan-ug-MB1705.pdf>

Adverse Storage Conditions Tips

We have been using the Adverse Storage Conditions (ASC) functionality for some time now. A common mistake is creating the ASC record before the inventory is moved into the quantity for review (QR) holding point location (HPL). You **must move** the inventory affected by the adverse storage condition to the QR HPL **BEFORE** you create the ASC record.

Forecaster Changes

Rotavirus: The forecaster has been changed to align with the March 1, 2018 Manitoba Health announcement declaring 'all infants born on or after March 1, 2018 eligible for 3 doses of rotavirus vaccine (RotaTeq®) at 2, 4, and 6 months of age'. The forecaster for infants born on or after March 1, 2018 will now normally forecast three doses unless Rota-1 (Rotarix™ the two dose vaccine) was specified as administered for both dose one and dose two.

Previously Rota immunizations were all assigned to the same tariff code and Rota immunizations entering Panorama via an interface (for example: physician billing) were represented by 'Rota unspecified.' Now, each Rota vaccine (Rotarix™ and RotaTeq®) has a specific tariff code.

In the Panorama agent drop down list you will now see Rota-1 (live monovalent vaccine Rotarix™) and Rota-5 (live pentavalent RotaTeq®). Prior Rota unspecified immunizations have been changed to Rota-1 in Panorama as that was the publically funded vaccine available since April 1, 2014 in Manitoba.

Varicella: The forecaster has been updated to validate a four-week minimum interval between doses for clients of all ages. The forecaster continues to recommend an interval of 12 weeks between two varicella-containing vaccines for children less than 13 years of age.

In general, the forecaster recommends the combined MMRV product for clients less than 13 years of age. Univalent varicella vaccine is forecast after age 13 years. Please note the following exceptions under age 13: Clients over 4 years of age receiving dose 1 MMRV: During the 8 week period of time between the MMR due date (four weeks later) and the varicella due date (12 weeks later), there will be separate forecasts for dose 2 of MMR and dose 2 of Varicella. Both MMR and V, or MMRV will be valid if administered (four week minimum interval used for validation).

The forecast for varicella dose 2 will not display when the first dose of a varicella-containing vaccine is given in the 12 weeks before a client's 13th birthday. The 2nd dose forecast for univalent varicella returns at age 13.

Notice of Change Form

Notice of Change Form: Please remember to help clients keep their Manitoba Health card information current and up to date. Any official updates made to the information that is found on the client's card is sent to Panorama daily. Panorama has a link to the online Notice of Change Form on the main dashboard page. The Notice of Change Form can be used to notify MHSAL of:

- Need for a replacement Health card
- Need to change an address on the Health card
- Permanent move outside of the Province of Manitoba
- Need to delete a spouse from a Health card due to divorce/separation
- Need to move a minor dependant(s) to another Health card

The Public Health Solution for Disease Surveillance and Management supports the identification, management and control of infectious diseases and outbreaks that pose a threat to the public's health.

Specify your Service Delivery Location (SDL).

* **Service Delivery Location:** Manitoba Health SDL

SDL Time Zone: CDT
