

# Public Health Information Management System

## SYSTEM UPDATE

MAY 2019

### May System Update

1. Communicable Disease Investigations
2. MHSU address reminder
3. Forecaster update
4. Immunization injection site documentation
5. Website changes
6. Inventory—catalogue item update
7. SDL report
8. Manitoba eHealth organization change

### Communicable Disease Investigations

Training is underway for the new Communicable Disease Investigations (CDI) module with Prairie Mountain Health (PMH) and Winnipeg Regional Health Authority Healthy Sexuality and Harm Reduction (HSHR) team!

**The target GO-LIVE dates for the CDI module are June 10 for the HSHR team and June 12 for PMH.** The potential impacts to PHIMS users not in PMH or HSHR will be with CD and STI re-directs. The process will remain the same but the faxes will come in PHIMS print-out format.

The PHIMS website has a new section in the Training and Support Tools, '7.0 Investigations', which includes new QRCs related to the Investigations module. The module can be explored in the Training Environment.

A summary of the changes that will support the deployment of the Investigations module include:

#### Reports:

- MB23400 - Contact Summary report – new
- MB2701C - Investigation Search report – revised
- MB2102A - Investigation Extract report – revised
- MB4120 - Lab results report – revised
- MB2102B - Investigation QA Report – development in progress
- MB2405 - Intervention Search report – testing in progress

#### Configuration changes:

- Workgroup name changes to support PMH and WRHA deployment – complete
- New Investigation Disposition values – complete
- Risk factors – three new risk factors added – complete
- Investigation Disposition – new code added: contact turned to case – development in progress
- Notes – three new immunization notes added – development in progress
- Intervention – two new Intervention values – development in progress

In addition, five new PHIMS user roles were added to support the implementation of the Investigations module.

### MHSU address reminder

A reminder for users to NOT update the preferred Official Registry Address. The Official Registry address MUST remain active (with no Effective To date) and preferred (have the preferred tag). The MHSU address should be used for communicable disease investigations. This MHSU address will identify for MB Health and RHAs which region is currently 'responsible' for the investigation. The QRC can be found here <http://www.phimsmb.ca/files/phims-qrc-7.1b.pdf>

For more information, visit:

[www.phimsmb.ca](http://www.phimsmb.ca)

## Forecaster update

Forecaster changes now in production: Hib schedule has been updated to validate an accelerated late-start schedule.

- Clients have been re-forecasted.
- Late entry to the schedule has changed, therefore validation rules have been changed so doses would not be marked as invalid.

The next forecaster changes in the works:

- Meningococcal B vaccine (4CMenB)— to reflect updated schedule.
- Meningococcal conjugate vaccine schedule—to include MenC-ACYW-135.
- Forecast DTaP-IPV-Hib (Pediace) instead of DTaP-IPV (Quadracel), which is no longer available.

## Immunization injection site Documentation

Additional injection site options have been added to the 'Site' drop-down menu, to allow the option of choosing upper or lower deltoid. This will accommodate the documentation of two injections into the same deltoid. This will also allow for documentation of these immunizations using the mass immunization worksheet. These changes went into effect on May 1.

\* Site: --select--  
Reason for Immunization: --select--  
Revised Dose Number: --select--  
Revised Dose Reason: --select--  
Revised Dose Comment: --select--

- Arm: upper left
- Arm: upper right
- Deltoid: left
- Deltoid: lower left
- Deltoid: lower right
- Deltoid: right
- Deltoid: upper left**
- Deltoid: upper right

## Website changes

The PHIMS website has been recently updated. The "Resources for Users" tab now includes:

- A new link called 'Tip Sheets', which houses the sections that were previously on the Trainers tab (there are additional changes to the Trainers Tab).
- A link called 'Reference Docs & Videos'. The Reference Docs & Videos page requires a username and password to access Investigations videos and some frequently used reference documents that were previously available without a password. If you require access to the Reference Documents page, please email the PHIMS Application Support Team at [phims\\_support@sharedhealthmb.ca](mailto:phims_support@sharedhealthmb.ca) to request a password.

## Reference Documents Login

Please enter your assigned username and password to access this page.

[www.phimsmb.ca](http://www.phimsmb.ca)

## Inventory: catalogue item update

There are three new catalogue items:

- **HyperRab S/D 300 IU/mL (1715113)** – 1/box. (HyperRab was previously available in a 150 IU/mL 2.0 mL vial, which will be discontinued). Deliveries of the new formulation will begin in June 2019. When the product is available, users will need to select the 1.0mL option at level 3 in order to select that product. Alternatively, entering the catalogue item code of 1715113 will bring users directly to the HyperRab 300 IU/mL 1.0 mL product.

### Catalogue Item Information

**Catalogue Item Search**

[www.phimsmb.ca](http://www.phimsmb.ca)

- **Afluria Tetra (1715115)** – 10/box – New QIV Influenza vaccine for the 2019/20 influenza season with an age indication of 5 years and above. Given the age indication, the majority of the Afluria Tetra doses will be allocated to pharmacy orders for pre-filled syringes since they are unable to immunize under the age of 7. It comes in pre-filled syringe format and the catalogue item name will be QIV Influenza 0.5ml PF-syr (5yrs +) - 10/box at level 5 and Afluria® Tetra (PF-syr) - 10/box at level 6.

## SDL report

The SDL report as described in the November 2018 System update is now available to all users. The report is to help users find service delivery locations and to verify the additional ID configurations (details such as SDL name, address, etc) are populated and correct.

## Manitoba eHealth name and organization change

Effective April 5, 2019, all Information and Communication Technology staff from Manitoba's Regional Health Authorities along with Manitoba eHealth, Shared Health (formerly DSM) and CancerCare Manitoba, came together to create a new, provincial Digital Health service. The day-to-day business activities will continue as per usual. Be aware of the changes, as our organization's name is now Shared Health and we will be operating as Digital Health, a Shared Health Service.

For inquiries and solution support, for all problems and service requests, contact the Shared Health Service Desk at: [servicedesk@sharedhealthmb.ca](mailto:servicedesk@sharedhealthmb.ca) or call 1-866-999-9698, indicating location (region, clinic name, department and/or site) and the name of the of the system/application you are having difficulty with. Email addresses have also changed; former [username@manitoba-ehealth.ca](mailto:username@manitoba-ehealth.ca) email addresses are now [username@sharedhealthmb.ca](mailto:username@sharedhealthmb.ca). Other location-based email addresses (e.g. Southern Health-Santé Sud) will retain their current email addresses and will be transitioned over at a later date. External/internal websites for information and services specific to Digital Health services are available here:

- Internal website: <https://home.sharedhealthmb.ca/digital-health/>
- External website: <https://sharedhealthmb.ca/services/digital-health/>
