

Laboratory Inbox:

Same Disease – Points to Remember

Page 1

QRC

Points to Remember

- Lab results should only be linked to Case investigations. Do not link lab results to a Contact investigation.
- The Subject Investigations drop-down list does not specify if an existing investigation is a case investigation or a contact investigation. Check the Subject Summary to confirm.
- If the client has an existing contact investigation and now has a positive lab result, create a new Case investigation.
- If the client has an existing open contact investigation, the message "The Disease [name] is Active on another Open Investigation for this Subject. Select a different Disease or submit again to bypass this validation." This message can be bypassed when the user has reviewed the Subject Summary and confirmed that a new Case investigation must be created.
- Applicable Investigations include all case investigations for Hepatitis B, C, HIV, AIDS or Syphilis and all other disease investigations where there is less than one month from the specimen collection date on the current lab and most recent specimen collection date in the lab summary. If no specimen collection date, listed use lab report date. It is preferable to link to an existing investigation then to create a new investigation. If in doubt, consult.

Laboratory Inbox: Same Disease – Existing Investigation

Page 2

QRC

Continue from **Process Message – QRC** (page 3)

The **Human Lab Report** page displays

Scroll to **Selected Tests** section. Select radio button beside the **Test ID**

Is there a Case investigation in the **Subject Investigations** drop list?

LHN > Investigation > **Subject Summary**

Review existing investigations and determine if any existing investigations are applicable

LHN > Investigation > Lab > **Lab Summary**

Select the radio button beside the report you just completed (review accession number from the Received Report)

Go to **Create an Investigation - QRC**

After reviewing the Subject Summary, is there an existing applicable Case investigation?

Scroll and select radio button beside the Test ID to see existing investigation(s)

The **Human Lab Report** page displays

Click **View/Update Report**

Select the applicable investigation ID *hyperlink* to set the investigation in context

Go to **Update Disease Details**

Click **Save**

Select the applicable Case investigation and click **Link to Investigation**

LHN > Investigation > Investigation Details > **Resp. Org/ Investigator**

If the organization corresponding to the current address is not displayed add secondary investigator

COVID Only
Will this report be sent to a non-PHIMS region?

Close **Received Report** on the second monitor

LHN > Investigation > Lab > **Electronic Lab Report Inbox**

Click **Retrieve** to populate the last filter criteria

Click **Display**

Go to **View Received Report – QRC** for steps to Print to PDF

Go to **Process Message – QRC**
