

Immunization: *Recording Consent when Proceeding Paperless/ Verbal*

Once you are in the client's immunization profile, scroll to the **Immunization History – Detailed Data Table** panel.

1. Select *Add Provider Recorded* or *Add Non-Provider Recorded*

The **Add Immunization** modal opens

Notice that the **Record Consent** button and the **Consent for Service Override/Bypass Reason** are grey out.

1. Select **Date Administered**
2. Select **Agent**

Once information entered, notice the **Record Consent** button has been activated and the **Consent for Service Override/Bypass Reason** is blank.

Immunization: Recording Consent when Proceeding Paperless/ Verbal

Save Reset

Immunization: *Recording Consent when Proceeding Paperless/ Verbal*

This function returns to the **Add Immunization** modal and you will notice that the **Consent for Service Override/Bypass Reason** does not display

The screenshot shows a web application interface for adding immunizations. The main heading is "Immunizations" and the sub-heading is "Add Immunization". The form includes the following fields and options:

- Immunization Type:** Provider Recorded
- Include non-inventoried agents
- * Agent:** COVID19-Moderna
- * Date Administered:** 2021/03/12 (with a calendar icon), hh:mn CDT
- Age at Administration:** 70 years, months, days
- Consent Readiness:** Granted
- * Reason for Immunization:** (empty dropdown)
- Information Source:** (empty dropdown)

Buttons at the top right include Save, Reset, More, log, and a close button. Buttons at the bottom right include Record Consent, Apply, and another Reset button.

Continue with process of adding immunization *provider recorded* or *non-provider recorded*
